Projects

Portfolio Website

matteogeraldo05 ↗

- A website to showcase myself. It features a smooth animations as well as a interactive terminal.
- Tools Used: HTML, CSS, Javascript

Live Semester Countdown

SummerBar ↗

- A website to count down the remaining days left in the Fall 2024 semester. It features a progress bar for a visual representation of the time remaining.
- Tools Used: HTML, CSS, Javascript

Basic Cat Game

Kitty-Game ↗

- A short but fun interactive cat game, made using pygame. Uses the famous internet cat to squish bugs.

- Tools Used: Pygame

WiiBoard   WiiBoard ⧉

- Inspired by Nintendo's home video game console, the Wii, and is currently a work in progress.
- The ultimate goal is to create an interactive platform where users can write and leave messages for future visitors.
- Tools Used: HTML, CSS, JavaScript

Gear 5 Website   Gear 5 ⧉

- Inspired by my favorite fictional story, One Piece, particularly the moment when the main character Luffy transforms into his fifth gear.
- This project has been a fantastic way for me to enhance my skills in CSS animation, allowing me to bring the excitement of that epic transformation to life.
- Tools Used: HTML, CSS, JavaScript

Windows XP Simulation   XP Website ⧉

- A tribute to the operating system that introduced me to the world of computers during my childhood.
- Created a desktop simulation using the XP.css framework during my high school spare time.
- Tools Used: HTML, CSS, JavaScript

Technologies

Languages: Assembly, C++, C, Java, Python, HTML, CSS, JavaScript
